

## Hướng dẫn cài đặt

Giải nén ta được folder **payment**, chưa các file, upload folder **payment** vào thư mục gốc của website, copy file **checkout.php** ra ngoài thư mục gốc của website

	act	7/25/2014 3:54 PM	File folder	
	content	7/23/2014 11:31 PM	File folder	
	css	7/23/2014 11:31 PM	File folder	
	help	7/24/2014 10:10 AM	File folder	
	includes	7/24/2014 10:48 AM	File folder	
	lib	7/24/2014 4:38 PM	File folder	
	checkout.php	7/25/2014 5:43 PM	PHP File	5 KB
	form.php	7/24/2014 11:50 AM	PHP File	2 KB
	Huong Dan.docx	7/25/2014 7:13 PM	Microsoft Word D...	12 KB
	index.php	7/24/2014 11:51 AM	PHP File	1 KB
	process.php	7/22/2014 2:33 AM	PHP File	2 KB
	template_hook.php	7/24/2014 12:37 PM	PHP File	7 KB

1. Bước 1: Vào Plugin & Products -> Manage Products -> Add/Import Products

2. Bước 2: Chọn file **product-game\_bank\_update.xml** để import vào Products trong thư mục Folder giải nén "includes/ **product-game\_bank\_update.xml**"
3. Bước 3: Sau khi cài đặt thành công product, vào mục **Settings -> Options**, Tìm mục Game Bank click chuột để vào **setting**

Lưu ý các thông số bên dưới có thể thay đổi, sau khi thay đổi xong thì nhớ 1 thông số đó là

Set Column ...

Game Bank
[Edit]
[Delete]
[Add Setting]
Help ?

Enable Game Bank Payment
[Edit]
[Delete]

Set option to **Yes** to enable Game Bank Payment ☒ Yes ☐ No

**Warning** default add to bottom next to **What's Going On?** form

Show top link
[Edit]
[Delete]

Insert link Game Bank payment to top link ☐ Yes ☒ No

Enable Widget
[Edit]
[Delete]

Enable widget to content: ☒ Yes ☐ No

**Warning!!!** Go to vBulletin CMS -> Layout Manager and add widget to content

Your Account ID
[Edit]
[Delete]

Type your **Account ID** on http://gamebank.vn:

Set Column
[Edit]
[Delete]

Type column name of table user in database to save user price:

**Wanning!!!** please insert 1 column in to table **user** form database

Name of Menu
[Edit]
[Delete]

Set name of tab in menu when show it....

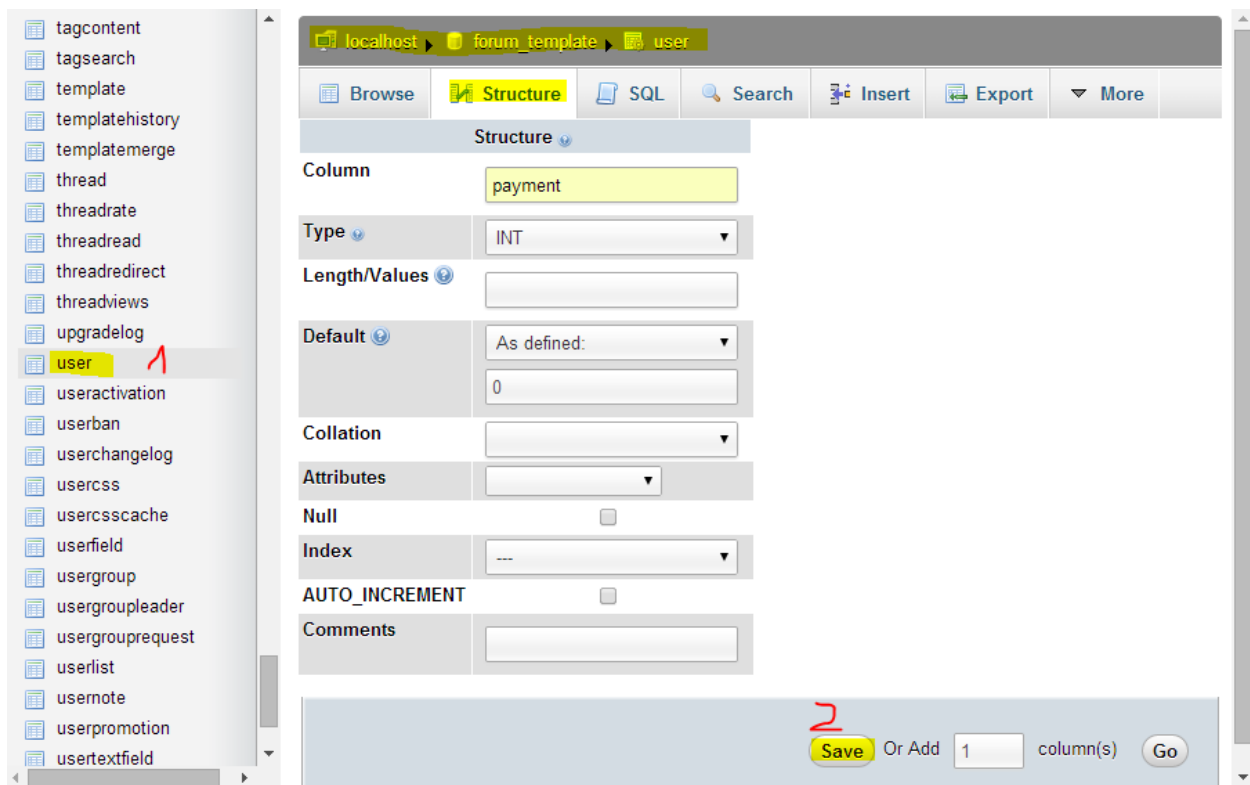

**Edited value to enable show in menu navbar**

Save

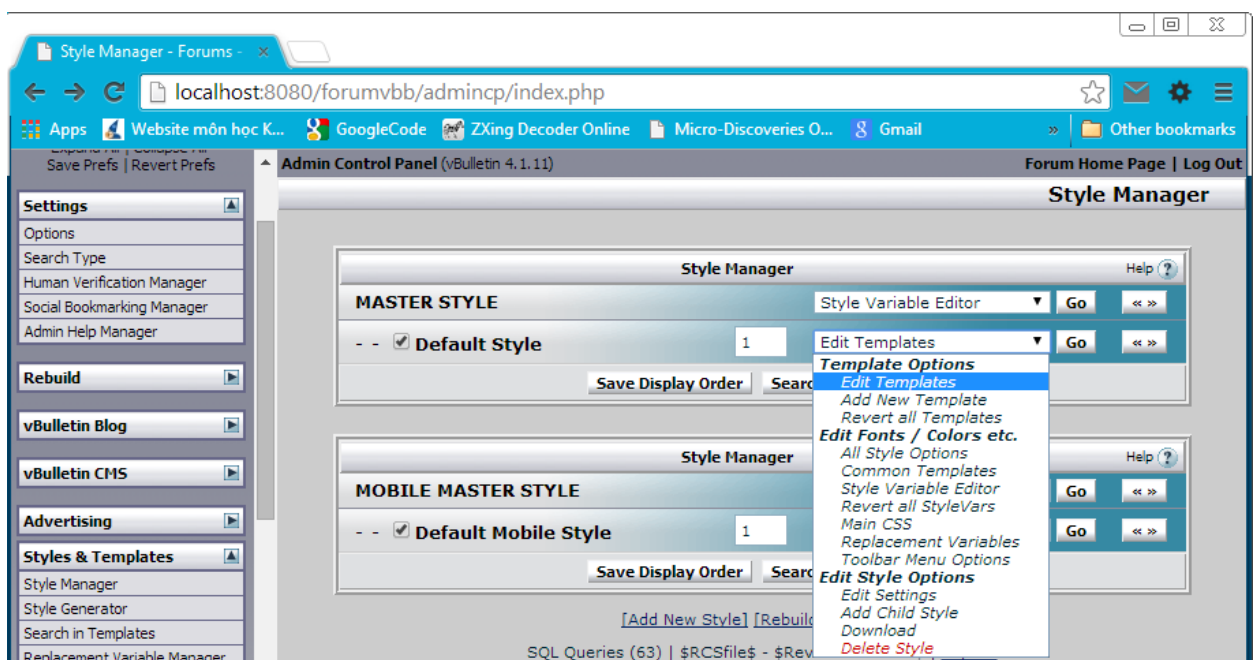

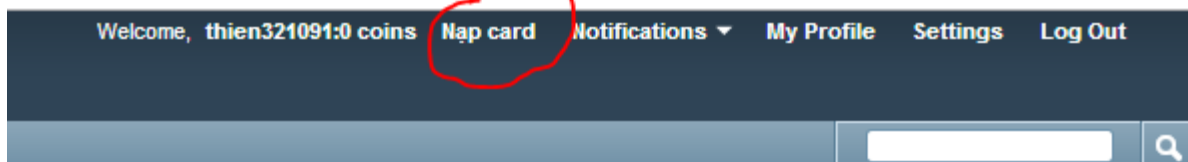

Reset

4. Bước 4: Nếu trong database đã có cột payment rồi thì không cần làm bước tiếp theo  
 Vào **MySql Admin** → vào **Database** → Vào **Table User** → Insert thêm 1 cột tên **payment**, Nếu  
 có sẵn 1 cột khác có thể sửa chữ **payment** thành tên cột đó

**Xem hình bên dưới**

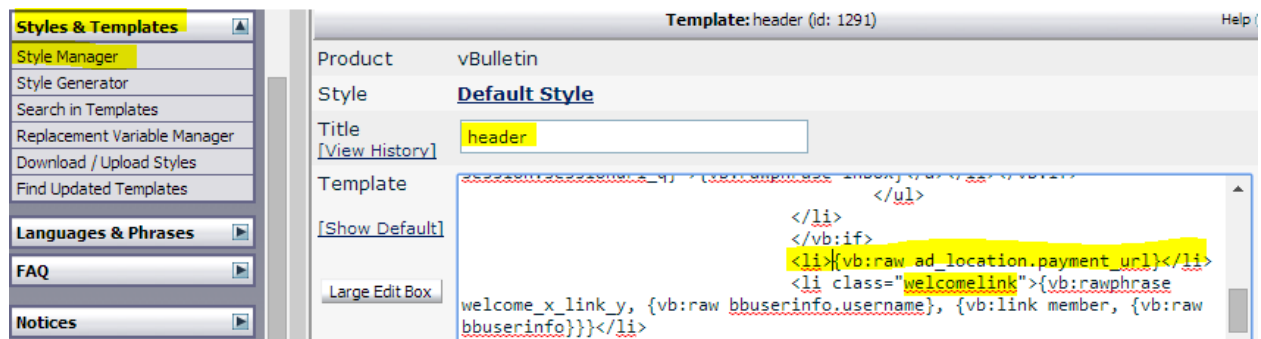

5. Bước 5: Để thêm **menu lên mục welcome user** vui lòng vào **Style & Templates -> Edit Templates** như hình bên dưới

Chọn template Header insert dòng

`<li>{vb:raw ad_location.payment_url}</li>` vào template

lưu ý nhớ tìm dòng **class="welcomelink"**

Bước 6: Copy nội dung của thư mục include ra ngoài thư mục gốc của vBulletin.

**/postings.php**

**/profile.php**

**/includes/class\_dm\_threadpost.php**

**/includes/class\_dm\_user.php**

**/admincp/user.php**

**/admincp/usergroup.php**

1. Vào file **/ includes / class\_dm\_threadpost.php** tìm dòng

class vB\_DataManager\_Thread extends vB\_DataManager\_ThreadPost

{

```
var $validfields = array(
    'payment_sticky'=> array(TYPE_UINT, REQ_NO),
    'threadid'      => array(TYPE_UINT, REQ_INCR),
    'title'         => array(TYPE_STR, REQ_YES, VF_METHOD),
```

Thêm 'payment\_sticky'=> array(TYPE\_UINT, REQ\_NO), vào như hình trên

2. Vào file **/includes/class\_dm\_user.php**

Tìm và thêm như hình : 'payment' => array(TYPE\_UINT, REQ\_NO),

```
class vB_DataManager_User extends vB_DataManager
{
    /**
     * Array of recognised and required fields for users, and their types
     *
     * @var array
     */
    var $validfields = array(
        'userid'      => array(TYPE_UINT, REQ_INCR, VF_METHOD, 'verify_nonzero'),
        'username'    => array(TYPE_STR, REQ_YES, VF_METHOD),
        'payment'     => array(TYPE_UINT, REQ_NO),
```

### 3. Vào file `/admincp/user.php`

```
print_input_row($vbphrase['post_count'], 'user[posts]', $user['posts'], 0, 7);  
/**  
 * Payment gamebank edit  
 */  
if($vbbulletin->options['payment_enable'] == 1){  
    print_input_row("Coins", 'user[payment]', $user['payment'], 0, 7);  
    print_table_break('', $INNERTABLEWIDTH);  
}  
  
// USER IMAGE SECTION  
print table header($vbphrase['image options']);
```

Tìm và thêm vào như hình :

```
/**  
 * Payment gamebank edit  
 */  
if($vbbulletin->options['payment_enable'] == 1){  
    print_input_row("Coins", 'user[payment]', $user['payment'], 0, 7);  
    print_table_break('', $INNERTABLEWIDTH);  
}
```

Và :

```
// ##### Start do update #####  
if ($_POST['do'] == 'update')  
{  
    $vbbulletin->input->clean_array_gpc('p', array(  
        'userid' => TYPE_UINT,  
        'password' => TYPE_STR,  
        'password_md5' => TYPE_STR,  
        'user' => TYPE_ARRAY,  
        'options' => TYPE_ARRAY_BOOL,  
        'adminoptions' => TYPE_ARRAY_BOOL,  
        'userfield' => TYPE_ARRAY,  
        'modifyavatar' => TYPE_NOCLEAN,  
        'modifyprofilepic' => TYPE_NOCLEAN,  
        'modifysigpic' => TYPE_NOCLEAN,  
        'modifycss' => TYPE_NOCLEAN,  
        'subscriptionlogid' => TYPE_ARRAY_KEYS_INT,  
        'olduser' => TYPE_BINARY,  
        'payment' => TYPE_UINT  
    ));  
  
$searchquery = "  
    SELECT  
    user.userid, user.\".$vbbulletin->options['payment_column'].\", reputation, username, use  
    birthday_search, email,  
    parentemail, (options & \" . $vbbulletin->bf_misc_useroptions['coppauser'] . \") AS coppau  
    aim, yahoo, msn, skype, signature,  
    usertitle, joindate, lastpost, posts, ipaddress, lastactivity, userfield.*, infraction  
    FROM \" . TABLE_PREFIX . \"user AS user  
    LEFT JOIN \" . TABLE_PREFIX . \"userfield AS userfield ON(userfield.userid = user.userid
```

#### 4. Vào file **/profile.php**

```
$page_templater = vB_Template::create('modifyusergroups_requesttojoin');
$page_templater->register('groupleaders', $groupleaders);
$page_templater->register('usergroup', $usergroup);
$page_templater->register('usergroupid', $usergroupid);

//gamebank -----
$page_templater->register('group_price', $usergroup['group_price']);
}
else
{

    // group is not moderated: update user & join group
```

Tìm và sửa như hình trên:

```
$templatere = vB_Template::create('modifyusergroups_nonmemberbit');
$templatere->register('bgclass', $bgclass);
$templatere->register('groupleaders', $groupleaders);
$templatere->register('ismoderated', $ismoderated);
$templatere->register('joinrequest', $joinrequest);
$templatere->register('joinrequested', $joinrequested);
$templatere->register('usergroup', $usergroup);
$templatere->register('group_price', $usergroup['group_price']);
$nonmembergroupbits .= $templatere->render();
}
```

5. vào file **admincp/usergroup.php** tìm dòng:  
**foreach (\$groupinfo AS \$grouptitle => \$group)**

thêm đoạn code sau trước nó ☺

```
if($vbulletin->options['payment_enable'] == 1){
    //Edit by Gamebank -----
    print_table_header(" Price perday to Join Group ");
    print_input_row("Set price of group",
"usercontentgroup[group_price]", $usercontentgroup['group_price'], 1, 20);
    print_table_break();
    print_column_style_code(array('width: 70%', 'width: 30%'));
    //Edit by Gamebank -----
}
```

**foreach (\$groupinfo AS \$grouptitle => \$group) .....**
